Credentials

- Company CAI Systemhaus mbH, Rimpar near Würzburg - Germany.

Mr. Geuther had an excellent, any time available expertise and sparked even difficult tasks very professionally and confident. He had always excellent ideas, gave valuable suggestions, to adopt all necessary measures and led them through determination.

- Company August Fassnacht GmbH, Lohr am Main - Germany

Mr. Geuther was entrusted with the task to work independently starting with the design for the customized solution up to installation. He has complied in all areas these requirements, both in hardware and network configuration, selecting the appropriate operating and application software, as well as the implementation of the installations to the fullest extent to our satisfaction.

- Company Kräuter Mix GmbH, Abtswind - Germany

The diverse requirements of its working area Mr. Geuther has complied in all respects and in the best manner. The challenges of newly added fields of activity he turned with great dedication and a high degree of own initiative. He did fixing of system problems with the utmost reliability. Working time limits played for him a subordinate role.

- HUK-COBURG VVaG, Coburg - Germany

Mr. Geuther was in our computer science department in the " Architektur und Image" as an "Specialist for connectors and integration." He took in this capacity the following tasks and projects:

- *Planning, design and development of prototypes for the "Capture Flow System" in the programming language REXX*
- *The main responsibility for planning, design and implementation of the "Capture Flow System" and associated system components in C + +*
- *Planning, design and implementation of "Scan & Subscript" workplaces under Windows (migration from OS / 2 to Windows)*
- *Reference Project "Schadennetz" of GDV*
- *Introduction to WebSphere MQ (MQSeries) on distributed systems*
- *Planning, design of DRG and OCR in the HUK-COBURG Insurance Company*
- *Planning, designing the OCR post-processing workplaces (OCE Levico)*
- *Conception of the fax connection to the DMS*
- *Planning, design and partial implementation of the microfiche data migration in the DMS*
- *Partial design of the VRK data migration*
- *Planning and design of software versioning and deployment in the " Architektur und Image"*
- *u.e.m.*

Mr. Geuther did transferred tasks reliably and responsibly always to our complete satisfaction.

- Company Ettel GmbH, Coburg - Germany

Hr. Geuther has successfully implemented the project for the monetization of our internet platform for us. He has in this case the project management and leadership in software development well under his leadership. His years of experience in the field of software development was a big plus for employees. We will always count to him as external support

- Talanx AG, Hannover – Germany
